6+ yrs

production engineering

50+

apps shipped

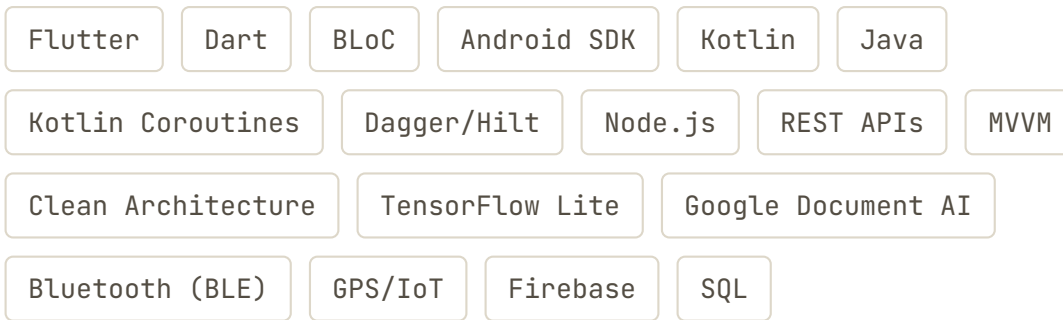

100,000+

users, one solo build

4

countries served

Core stack

Projects

Grouped the way I actually think about this work — not a flat list.

Flagship solo build

Salary Slip HR & Payroll · Native Android

100K+ USERS

Independently architected, built, and scaled a payroll platform from zero to 100,000+ organic users with no marketing spend. Dual-sided: an employee app (GPS-based attendance, payroll, business tools) plus a companion employer/admin app with role-based access.

Solo · built during tenure at Inventics Software Pvt Ltd

The original Android listing reached 280,000+ downloads before being relisted under a new package; the historical record is independently archived below.

IoT & hardware logistics

Blue Star ELD Fleet Management · Native Android

4.8/5 · 5,000+ DL

FMCSA-compliant fleet management app built from scratch, integrating ELD hardware over Bluetooth (BLE) for real-time GPS tracking and

automated Hours-of-Service violation logging. White-labeled for multiple US transport companies.

Client project · Virtual Employee Pvt. Ltd.

[Google Play →](#)

Enterprise AI & computer vision

RestusPOS Restaurant Tech / AI

Built the Warehouse Management module — inventory, inventory scanning, transfers, customer/supplier orders, supplier management, damaged-stock tracking, receiving. Contributed invoice and reconciliation features using Google Document AI for automated data extraction.

Team project · Virtual Employee Pvt. Ltd.

[Google Play →](#)

AGView AI / Agriculture · iOS

Integrated a pre-trained TensorFlow Lite computer vision model into a client iOS application for on-device agricultural image analysis.

Multi-tenant international commercial systems

IRIS Signage Digital Signage · Flutter Full-Stack

Full-stack multi-tenant digital signage platform — a Flutter Web admin panel with role-based access (super admin, business owner, manager), a Flutter TV display app, and a Node.js backend engineered from scratch. Live across 5 businesses in Cyprus.

Solo · built from scratch · Virtual Employee Pvt. Ltd.

Restaurant Ordering Platforms

Food Ordering · Flutter, Web + Android + iOS

Full-stack ordering platforms for a family of Cyprus food brands — menus, ordering, delivery/takeaway, rewards, API integrations. Plus a website-only build for Papa John's Cyprus.

Solo · built from scratch · Virtual Employee Pvt. Ltd.

Brands: BlueSub, Heraclis, Volta, Goc (rebranded as GMI Cafe), Chopsticks, China Spice, Papa John's Cyprus (web only)

Successfully Mental Wellness

4.6/5

AI-powered habit and goal-tracking app with personalized routine recommendations, habit streaks, and a personal-coach selection feature.

Client project · Virtual Employee Pvt. Ltd.

[App Store →](#)

Kiosks — self-service, 32-inch touchscreen

One reusable Flutter kiosk codebase, deployed as five separately branded, separately published self-service ordering systems — each its own listing, built and maintained as its own project.

Chopsticks Kiosk Native Android

Solo · Virtual Employee Pvt. Ltd.

Solo · Virtual Employee Pvt. Ltd.

[Google Play →](#)

Malthouse Beer n' Food Kiosk Native Android

Solo · Virtual Employee Pvt. Ltd.

[Google Play →](#)

Additional native Android

Goodz C2C Marketplace · UAE

Native Android (Java/Kotlin) C2C marketplace for second-hand furniture, enabling buyers to browse, chat, and negotiate prices with sellers. Built with Kotlin Coroutines, MVVM, and Dagger/Hilt; in-app chat with real-time order-status notifications and receipt generation.

Led Android development · Virtual Employee Pvt. Ltd.

[Google Play →](#)

CreditR Fintech

Invoice financing and credit-line approval platform — application flow, credit approvals, and secure transaction handling.

Solo · built from scratch · Inventics Software Pvt Ltd

[Google Play →](#)

Online Maths Education · Grades 6–12

4.4/5 · 10,000+ DL

Self-learning platform with a custom mathematical expression parser, course booking, live classes, and an interactive whiteboard.

Solo · built from scratch · Zeabros India Pvt Ltd

[Google Play →](#)

Experience

Aug 2022 – Present

Senior Software Engineer

Virtual Employee Pvt. Ltd. · Noida

Architecting cross-platform and native Android systems for international clients across the US, Europe, Cyprus, and UAE — from IoT hardware integrations to on-device AI to multi-brand commercial platforms.

Jun 2021 – Aug 2022

Mobile Application Developer

Zeabros India Pvt Ltd

Owned full development lifecycle on production Android and Flutter products, including JWT-based auth and media-handling workflows.

Feb 2020 – May 2021

Software Engineer

Inventics Software Pvt Ltd

Native Android development for business and education products — local persistence, API integrations, production

fixes.

Master of Computer Applications (MCA) — Institute of Engineering and Technology (IET), Lucknow, 2017–2020

Open to relocation: Noida / Bengaluru / Hyderabad · rahul.rai955@gmail.com
